## Madad exclusive, documents revealing... America occupies Yemen!

It was not unlikely for America, the head of the crusade against the Islamic world – after its failure in the battle with the Mujahideen in Iraq, to withdraw its troops from that quagmire into which the sons of Islam had led it...

In spite of all the facilities and services that “Ali Saleh” has made available to hit the Muslims in Yemen, by air and land invasion and support from his security services and from his sons and nephews, it still would accept no less than full occupation. It took over the air and the seas. And how it lands its soldiers on the Land of Faith...

Madad publishes exclusively the vanguards of American occupation while in Sanaa; it got these images from private sources and we dedicate this issue to shedding light upon this catastrophe, which should be considered the worst that Yemen has been through yet in these difficult circumstances...

It's no longer a secret that American intended to occupy Yemen since right from the start of the crusader war against Muslim countries, the ex-defence secretary Rumsfeld said after the fall of Baghdad near the end of March 2003CE – according to the Gulf Times that “Yemen and Nigeria are the next targets in the US 'War on Terror'”. Those statements were not merely empty words; as America gradually worked

**American Soldiers in Sanaa 11 / 2011**

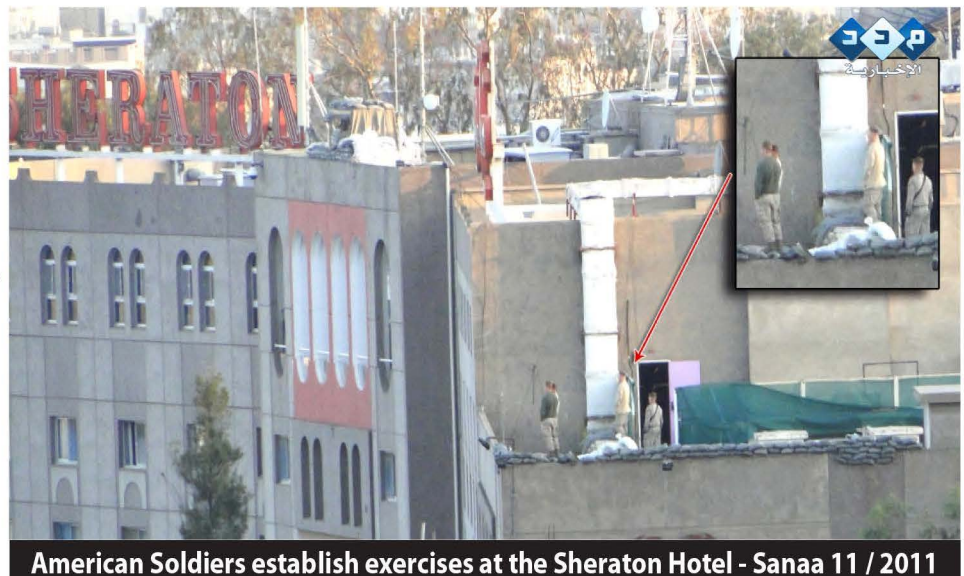

starting with security, financial and unending military aid to the regime of “Ali Saleh”, through controlling the air and sea of Yemeni territory with warships, and right through to sending American vanguards to the land of Yemen coinciding with the start of revolutionary spring in some Arab countries, taking advantage of the turmoil the country is going through.

There are the vanguards of American troops residing in the Sheraton hotel and setting up road-blocks and checkpoints in the Yemeni capital Sanaa.

American soldiers were seen in Hadramaut in the area of “Khalaf” in Makalla near the hotel “Arab sea” and the “Holiday Inn” hotel – which is a military region where the headquarters of the eastern province base is – and American soldiers were also behind the presidential palace in Makalla, this has been confirmed by eyewitnesses and rights activists.

It should be mentioned that American forces came to Sanaa after establishing a base in the Island of Soqatra as mentioned by media sources.

**The stance of Yemeni scholars:**  
This major disaster on the state of Yemen has given its scholars a clear challenge: to transform their words into actions – as confirmed by observers – it was already said in a statement: “In case any foreign power insists on invading the country or in case of military or security intervention, Islam makes it obligatory on all its sons to perform Jihad to repel the attack of the invaders” especially having said also in the index of the statement: “there's some American-British plan in collaboration with NATO to occupy Yemen through the London summit, and by sending troops to Yemen, and placing it under their guardianship”

## Position of the opposition parties

As for the opposition parties, it had a totally different stance, in the past it used to discredit "Ali Saleh" for allowing the American air force to target Yemenis on their land; in 2002CE through a statement by Islah, the socialist, Nasserite, Baath, Shia Hag parties and the People's Forces Union and September organisation, which said that it [the parties above] stood against the American attack on a car in Maareb and considered it a transgression against the sovereignty of Yemen as an independent state. It also accused the government of collaborating and handing over Yemen's sovereignty and the blood of Yemeni citizens. It put the responsibility on the government for the dangerous results that came as a result of giving away national sovereignty, and asked for it to stop the misleading media and the political mischief which it [i.e. the government] practices with regards to military and security cooperation with the United States. It also talked about the necessity of being transparent with the Yemeni nation about what is happening, and stated that all these actions must be subjected to inspected by the legislative, national and civil authorities, and the statement asked the parliament to question the government about their collusion in violating national sovereignty. It also called for the Yemeni people to be cautious and vigilant against all that threatens Yemeni stability, sovereignty and security.

That situation has changed under the current circumstances, as the parties had no statement about the American transgression of violating Yemeni airspace with their Air Force, and the bombing and killing of Muslims in Shabwa and Abian and killed the Sheikh Anwar al-Awlaqi and his son Abdul Rahman and the unlimited aid given by "Ali Saleh" to the Americans. The opposition has actually gambled that the revolution's success is dependent on the satisfaction of America and the West, and it even went on to invite America and France to breach "national sovereignty" as in the declaration of "Ba Fadl" head of the Islah party's parliamentary committee.

### The stance of the Mujahideen:

"Mohammad al-Obaidi", one of the Mujahideen, said in response a question by "Madad": "We - by the grace of Allah - have always been ready, and will always be ready, to fight in the cause of Allah, and to repel America. And since it announced its Crusade against the Muslim countries we have been preparing what's necessary for the confrontation, and America will always receive from us the same that it has suffered on the Afghanistan mountains and on the shores of the rivers [Iraq]" And he added: "We call for our Muslim nation in Yemen and especially the scholars and the youth to do their part in fighting the Crusaders, and to force them to miss the opportunity to spread across the country. And this can be done by waging Jihad against the Crusaders and their loyal agent "Ali Saleh", who opened the skies of Yemen to them and its land and seas, and we call upon them to join the ranks of Mujahideen who have prepared camps to train the youth on how to use various kinds of weapons. And these camps have produced many fine Muslim youth, and many more still are graduating from them, in camps all over Yemen and outside as well, by the grace of Allah. And the Mujahideen know best about how to fight the Americans and their allies through the battles which they have fought previously, and still are fighting today, Allah gave them guidance to hit the USS Cole when it entered Yemeni shores in the year 2000CE".
